

**WARNING: Vacuduct® Fiber**

DMS incorporates refractory ceramic fibers (RCF) into various products. Refractory ceramic fibers are a safe product when adhering to recommended safe work practices. Projects that include finishing, installation, and removal of the fiber product create the greatest health risk. When engineering controls and/or administrative controls are insufficient to maintain workplace concentrations within the 0.5 f/cc REG, the use of appropriate respiratory protection, pursuant to the requirements of OSHA Standards 29 CFR 1910.134 and 29 CFR 1926.103, is recommended.

A comprehensive exposure assessment and engineering controls evaluation of refractory ceramic fibers products should be performed with the assistance of a qualified industrial hygienist.

**DISCLAIMER**

The characteristics of the Vacuduct RCF products are contained in the Material Safety Data Sheets (MSDS) provided by Danser, Inc. It is the responsibility of the user to comply with all federal, state, and local regulations. The information contained in the Material Safety Data Sheets is considered to be reliable. However, no guarantees or representations of any kind are made as to its accuracy when applied to particular storage, handling, or processing of the material, and hazards associated with the use of the material. For more information, please visit the Refractory Ceramic Fibers Coalition web page: [www.rcfc.net](http://www.rcfc.net).
